AT A GLANCE

Now you have turned your iPhone/iPad into a superb recording device and jukebox!

EarGizmo records, plays, sorts, and organizes your music files easily. With enhanced microphone control the recording quality is outstanding. Recordings are created instantly with a single tap of a button. The record file names are automatically generated with date and time stamp. **EarGizmo** is iTunes compatible for ease of downloading and saving recordings.

Features

- Create custom Playlists
- Listen to your music anywhere – offline and NO data streaming
- Make instant, crystal clear recordings
- Automatic file naming for recordings
- iTunes compatible for Library creation and saving your recordings for export
- Automatic or Manual Gain Control
- Peak and Average dB sound levels displayed
- iOS Control Center and Lock Screen Media Control display ID3 data
- NO In-App purchases or Ads

Operations

- Record Instantly
- Pause/Resume Recording
- Stop Recording/Playing
- Pause/Resume Playing
- Play from Library or Playlist

Options

- Internal Speaker – Forced On (default) or off for headphone use
- Microphone – Auto Gain (default) or off for manual mode
- Output Volume – Volume Level of 0.60 (default) or user settable
- Microphone Gain – 0.60 (default) or user settable when Microphone is in manual mode
- Playlist – Disabled (default) or Enabled to display Playlist
- Shuffle Playlist – Disabled (default) or Enabled to allow random selection of songs from the Playlist
- Clear Playlist – Disabled (default) or Enabled to delete all songs from the Playlist

QUICK START

MANAGING AUDIO FILES

1. Manage your **EarGizmo** Library:
 - To Add audio file to your **EarGizmo** Library:
Download audio file from your iTunes Library.
 - To Delete audio file from your **EarGizmo** Library:
Delete audio file from your iTunes Library. Your **EarGizmo** Library will update.
 - To Export audio file from your **EarGizmo** Library:
Upload audio file to your iTunes Library. From there you may download to another device.
2. Manage your **EarGizmo** Playlist:
 - Verify that the **Playlist** switch is Enabled.
 - To Add audio file to your Playlist:
Tap audio file in the **EarGizmo** Library. File will appear at the bottom of the Playlist.
 - To Delete audio file from your Playlist:
Double tap the file to be deleted.
File is highlighted Red. Tap file again to delete.
To cancel delete when highlighted Red,
Tap any other file in the Playlist or tap **Play** button.
 - To Delete all audio files from Playlist:
Enable the **Clear Playlist** switch.

PLAYING AUDIO FILES

1. To play from your **EarGizmo** Library:
 - Verify that the **Playlist** switch is Not Enabled.
 - To Play: Tap an audio file in your **EarGizmo** Library. File is highlighted Green and starts playing. Play will stop at end of audio file. File is highlighted Gray.
 - To Stop Playing:
Tap **Stop** button or tap **Pause Play** button. File is highlighted Gray. When paused you may tap **Resume** button to continue playing or **Stop** button.

2. To play from your **EarGizmo** Playlist:

- Verify that the **Playlist** switch is Enabled.
- The top file is highlighted Gray. To play the list starting with the top file tap **Play** button. File is highlighted Green and starts playing. Each file on the Playlist plays sequentially. The Playlist plays continuously and wraps from the bottom file to the top file.
- To play the list starting with any other file, tap the file. The file is highlighted Gray. Tap the **Play** button. The file is highlighted Green and starts playing.
- To play the list in random order Enable the **Shuffle Playlist** switch.
- To Stop Playing:
Tap **Stop** button or tap **Pause Play** button. The file is highlighted Gray. When paused you may tap **Resume** button to continue playing or **Stop** button.

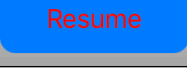

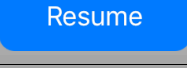

RECORDING AUDIO FILES

Record instantly by tapping the **Record** button.

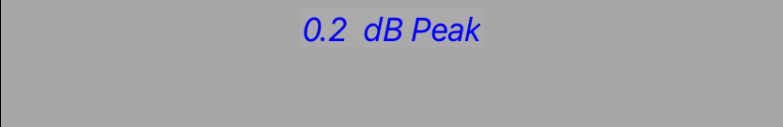

- Recording may be paused and resumed during the recording session by tapping **Pause Recording** and **Resume** buttons.
- When finished recording tap the **Stop** button. The file is saved automatically and is displayed at the top of the **EarGizmo** Library. The filename structure is EarGizmoDDMMYY_hhmmssAA where DD=Day, MM=Month, YY=Year, hh=hour, mm=minute, ss=second, AA=AM or PM.
- Values for dB Peak and dB Average are displayed during the recording session.
- Prior to recording, the **Microphone** switch may be set to **Auto Gain** (default) or **Manual Mode**.
When set to Manual Mode, the Microphone Gain Level can be adjusted from 0.00(min) to 1.00(max) using the **Microphone Gain** slider.

LISTS

Library		Displays a list of all audio files in the Library when there is at least one audio file in the Library
Playlist		Displays a list of all audio files selected for automatic play when the Playlist switch is Enabled

TROUBLESHOOTING

COMMON PROBLEMS

Problem: Can't hear anything when playing

Solution:

1. Check iPad/iPhone to verify that the volume level is set to max volume.
2. Check that the **EarGizmo** Output Volume Level is greater than zero.

Problem: Having trouble selecting files for my Playlist

Solution:

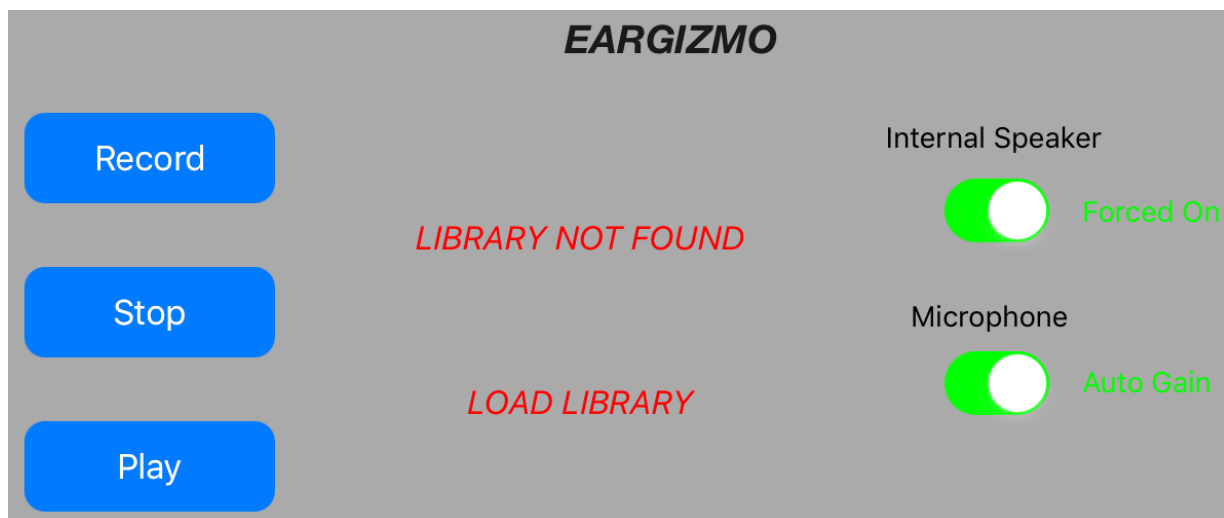

1. Verify that the Playlist Enable Switch is ON
2. A file must not be playing (Pause Play button would be visible). Tap Stop button.
3. Tap a file from your Library so that it is highlighted Gray. The file will appear at the bottom of your Playlist.

Problem: Don't know how to use iTunes

Solution: Download the iTunes App, open it, click on "Help" on the Menu Bar at the top of your screen and select iTunes Help. It explains how to build your iTunes Library and how to download it to other devices.

ERROR MESSAGES

1. LIBRARY NOT FOUND LOAD LIBRARY

These error messages appear when **EarGizmo** is opened and you have not created your **EarGizmo** Library yet. To resolve these errors, first tap the **Stop** button to clear the error messages. Then you have 2 choices:

- a. Create your **EarGizmo** Library by downloading files from your iTunes Library.
- b. Create a recording by tapping the **Record** button. Tap **Stop** button. Your recording is now displayed as the first file in your **EarGizmo** Library.

2. RECORD ERROR

MICROPHONE ERROR
ENABLE MICROPHONE

These error messages are displayed when you try to Record and your device microphone is disabled. To resolve these errors, first tap the **Stop** button to clear the error messages. Then go to your device Settings and enable the microphone.

3. # PLAYLIST ERROR(S) where # is the number of errors

EDIT PLAYLIST

These error messages are displayed when you open **EarGizmo** and there are 1 or more files in your Playlist that are not in your **EarGizmo** Library. This happens when you delete a file listed in your Playlist from your iTunes Library. To resolve these errors, first tap the **Stop** button to clear the error messages. Then you have 3 choices:

- a. Resolve the errors by manually comparing your Playlist to your **EarGizmo** Library and finding the Playlist file(s) that are not in your Library. Then delete the Playlist file(s) by double tapping each file to be deleted. File is highlighted Red. Tap file again to delete.
To cancel delete when highlighted Red,
Tap any other file in the Playlist or tap **Play** button.

- b. Resolve the errors by letting EarGizmo find the Playlist file(s) that are not in your Library. Do this by playing your Playlist and fast forward through each file until play stops. You have found the bogus Playlist file. It will be highlighted green. Then these error messages are displayed:

***PLAYLIST ERROR
DELETE FILE***

Tap the **Stop** button and delete the Playlist file by double tapping the file to be deleted. File is highlighted Red. Tap file again to delete.

To cancel delete when highlighted Red,
Tap any other file in the Playlist or tap **Play** button.

- c. Resolve the errors by finding the Playlist file(s) that are not in your Library as described in a or b above. Then use iTunes to add the file(s) back to your iTunes Library and **EarGizmo** Library.
